Mixcraft 4 — \$64.95

Mixcraft 4 allows you to record and mix like the best producers and DJs at just a fraction of the price. Remix songs, record your band, create MIDI compositions or make your own backing tracks or songs with our built in sound library and virtual instruments. Focus on your creativity and not on technical details! Cut, paste, edit and shape your sounds the way you want! Use built in effects like reverb, flanger or EQ or install a variety of DirectX or VST effects to add tremelo, distortion, chorus or even remove the vocals from a song! This flexible software can be used in many ways, from recording your first solo album, remixing a song mash-up, pod-casting, editing commercials or even making a production for your daughter's dance or gymnastic recital! You can even export your mix to MP3, WMA, OGG or WAV, or simply burn it on a CD!

Features include:

- Clear, colorful, and intelligently designed interface to streamline your work.
- Custom loop library includes hundreds of royalty-free sounds in dozens of musical styles. (Works with Acid(tm) and Apple Garage Band(tm) loops.)
- Record multiple MIDI and audio tracks simultaneously.
- Piano roll to view and edit MIDI.
- Includes a General MIDI library, sampled grand pianos, Hammond B-3(tm) emulator, MiniMoog(tm) emulator and a polyphonic synthesizer.
- Create mega presets that layer and split multiple virtual synthesizers and effects.
